Baringo County FAMILY PLANNING FACT SHEET

County Vision

To be the most attractive, competitive, and resilient county that affords the highest standard of living and security to all its residents.

Spotlight on Baringo

Only 15%

Less than half (45%) of school-age children are enrolled in

secondary school

68% of married adolescents

want to delay or prevent pregnancy but are not using family planning

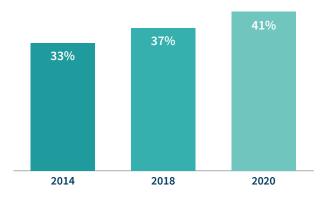

488 deaths per 100,000 births

Baringo has a **higher maternal mortality rate** than Kenya as a whole (374)

Funding for Family Planning Will Improve Quality of Life and Economic Competitiveness in Baringo

Investments in voluntary, client-centered family planning lead to a better-educated, healthier population and improve economic competitiveness. To increase access to family planning, in 2018 the Baringo County Health Department developed a Family Planning Costed Implementation Plan (CIP). However, current budget allocations for family planning fund less than 3% of the CIP budget. CIP Goal: Increase the modern contraceptive prevalence rate to 41% by 2020

Investments in family planning w	rill
Avert over 2,000 maternal and child deaths over five years.	Help girls stay in school to avoid early marriage and teenage pregnancy, and prepare them to enter the job market.
Promote healthier, planned pregnancies by improving birth spacing.	Support women's full economic participation.
