

EXERCISE

1.2

Policy Landscape

Below, indicate what you know about the policy landscape for your issue. If you are unsure, suggest where you might be able to find more information. Finally, consider which information would be most valuable to you in planning your campaign.

1. What is your policy issue?

2. Who are the stakeholders?

3. What policies/strategies address this issue? Consider national, subnational, and institutional policies. Circle or highlight the policy/policies that would be most important to read and understand.

4. How are the mandates from the policy or policies above funded? Who makes those funding decisions?

5. What do the policy or policies you identified specify about how they will be implemented? Who enforces them?

6. Have any officials made recent statements or commitments on your issue?
